BLACK BEAUTY®

HEAT & DROUGHT

PREMIUM GRASS SEED MIXTURE

CONTAINS TALL FESCUES AND TEXAS BLUEGRASS
withstands heat up to 100°F

GROWS WELL IN SUN OR SHADE
germinates in 14 to 21 days

NATURALLY DARK GREEN
requires less water & fertilizer than other grasses

WHY BLACK BEAUTY?

- UNIFORM, VERTICAL GROWTH HABIT
- GROWN BY SOD GROWERS ACROSS THE USA
- DEEPLY ROOTED FOR HEALTHY TURF

Jonathan Green Black Beauty Heat & Drought Grass Seed Mixture is our most heat and drought-tolerant mixture. It contains Texas Bluegrass and Black Beauty Tall Fescues and grows well in sun & shade areas. Texas Bluegrass can withstand very hot temperatures, up to 100°F, and requires less maintenance with fewer inputs than other grasses.

See the map where Black Beauty Heat & Drought thrives.

Spring plantings may take more time to germinate.

CAUTION: Do not apply this grass seed on horse pastures or livestock grazing areas!

DIRECTIONS

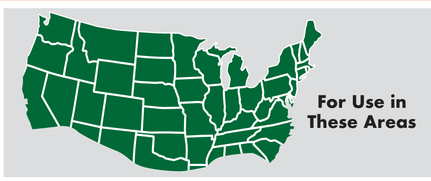
SUCCESSFUL SEEDING CAN BE ACCOMPLISHED IF THESE PROCEDURES ARE FOLLOWED FOR BOTH OVERSEEDING LAWNS AND ESTABLISHING NEW LAWNS OR SODDING.

1. PREPARATION: Good seed-to-soil contact is very important in order to achieve good germination of the planted grass seed.

(a) Mow lawn before seeding.

(b) Rake dead grass and debris and loosen the soil. Add additional topsoil if needed. For larger areas, a rented de-thatching machine may be easier.

Apply seed to the loosened soil and then lightly rake it into the ground. Do not bury the seed more than 1/4" deep.



2. For best results, apply these **Jonathan Green** products in any order, on the same day.

Jonathan Green Veri-Green for Seeding & Sodding Provides the nutrients necessary for new grass growth.

Jonathan Green MAG-I-CAL Plus for soil compaction and pH adjustment
Helps loosen hard, compacted soils. Provides calcium - an essential grass plant nutrient which aids in the seedling's ability to absorb nutrients.

3. Seed bed should be kept moist for a few weeks while the grass seed germinates. Mow the new grass after it has reached a height of 2-1/2 to 3 inches.

Consult your dealer concerning follow-up fertilizer applications and maintenance advice.

My Pledge Of Satisfaction
We have made every effort in the formulation of this product to assure that you will be satisfied with the results. If, for any reason, you are not satisfied, please write and describe the problem. Our lawn specialists will make every effort to assure your success.

Jonathan Green

Benefits of lawns: Grass slows down and absorbs water run-off and controls soil erosion while cleansing water of impurities and dust. Grass plants remove carbon dioxide from the atmosphere. A 5,000 sq. ft. lawn produces enough oxygen for 8 people daily. Lawns cool off the immediate area, about 30 degrees cooler than asphalt and about 20 degrees cooler than bare soil. Lawns reduce noise, glare and increase your property value. Leave grass clippings, if possible, so nutrients and water go back into your lawn.
