CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using the toilet. Remove and wash contaminated clothing before use.

FIRST AID	
IF ON SKIN OR CLOTHING:	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF IN EYES:	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contacts, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.
IF SWALLOWED:	Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED:	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-757-8951 for emergency medical treatment information.	

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertabrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

DIRECTIONS FOR USE

It is in violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

WHEN TO APPLY

Apply CRABGRASS PREVENTER PLUS NEW SEEDING LAWN FERTILIZER prior to germination of weed grasses in the Spring. Precise time of application for a specific area will vary due to climate and individual cultural practices. Generally, application during February or March will give best results. Control can be expected by applications up to the time that Forsythias bloom in Spring. If in doubt, check with your Agricultural Extension Service. For newly seeded areas, apply as the last step before watering.

HOW TO APPLY

For best results, this product must be applied without skips or misses. Determine the correct amount for your lawn area. For freshly seeded grass apply at the rate of 2.6 to 3.3 pounds per 1,000 square feet.

The best results are obtained by using the two-step procedure at the recommended half rate settings. Apply half the required amount in one direction and the other half at right angles to the first application. This procedure will minimize the chances of color streaking and erratic crabgrass control.

Use the suggested spreader settings as a guide, being sure to check the application rate at the start of each application. At least 1/2 inch of water must be provided by rainfall or watering within 3 days of treatment in order to carry the chemical into the root zone of germinating weeds.

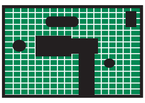
RESTRICTIONS

Do not apply this product in a way that will contact any person, pet, either directly or through drift. Keep people and pets out of the area during application.

Do not allow people or pets to enter the treated area until dusts have settled. If watering-in is required after the application, do not enter or allow people or pets to enter the treated areas (except those involved in the watering) until the water-in is complete and the surface is dry.



_____Length (Feet)
x_____Width (Feet)
=_____Total Square Feet
- _____Non-Lawn Areas
=_____Total Square Feet coverage you need

COVERAGE: To determine how much you need, multiply the length of your lawn by its width. This equals your total square footage. Deduct any non-lawn areas (house, gardens, etc.) One bag covers up to 5,000 sq. ft.

SPREADER SETTINGS

Important: It is important to follow the directions as indicated so that injury will not occur to the lawn. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied, and roughness of area treated. Be sure to check spreader at the beginning of the application; adjust spreader if necessary.

BROADCAST SPREADERS

	New Lawns 3 lb. rate
Jonathan Green	
Green-Meter	**5**
Go-Green	**5**
Black Beauty Pro-Green	**5**
Hand Spreader	**3**
Cyclone	3-1/2 to 4
EZ Republic	2 to 2-1/2
Earthway (Ames)	11 to 12
